

SPEAKING OPPORTUNITIES

Alternative Energy & Building Efficiency Conference & Exhibition Chicago, being held at the Schaumburg Convention Center in Chicago, still has speaking opportunities available.

If you would like to present at the AE&BE Chicago, please contact us at info@AlternativeEnergyShows.com.

The topics can broadly cover the whole of the alternative energy industry (all technologies, including emerging technologies) as well as the energy efficient building industry.

Of particular interest would be topics on ways to manage your energy costs in a home or building, new products (either alternative energy or energy efficient building), new techniques, legal issues, financial, and of course case studies.

Please write to us with a brief overview of your proposed topic.

All Speakers are entitled to a 50% discount off a booth.
